E-mail: ceo@initiatorpharma.com

The information was provided by the contact person above, to be published on the 1st of February 2021, at 08:00.

About Initiator Pharma

Initiator Pharma is a clinical-stage biotechnology company based in Aarhus, Denmark. The company's main clinical Phase assets are IPED2015, intended for patients with erectile dysfunction, and IP2018, for the treatment of psychogenic erectile dysfunction. The treatments both represent First in Class treatments for psychogenic and organic ED, respectively, and are expected to improve the quality of life for a growing number of patients who are not responding to or cannot be treated with existing drugs on the market. Read more on www.initiatorpharma.com.

About Erectile dysfunction (ED)

Erectile dysfunction is sexual dysfunction characterized by the inability to develop or maintain an erection of the penis during sexual activity. ED affects more than 150 million men worldwide and that number is expected to increase to more than 320 million by 2025, fuelled by aging demographics and increasing prevalence of lifestyle diseases such as diabetes, and performance anxiety. The number of ED patients is most likely grossly underestimated, particularly for Psychogenic patient segment. ED patients have decreased quality of life due to various psychosocial factors such as low self-esteem, depression, sadness, anger, frustration, anxiety, medication, and relationship problems (1,2,3). Erectile dysfunction can be divided into two main categories – Organic and Psychogenic ED – that requires different treatments. Initiator Pharma is developing IPED2015 and IP2018, respectively, for these similar but separate patient segments.
