About Initiator Pharma

Initiator Pharma is a Biotech company established in Aarhus, Denmark. Its main asset IPED2015 represents a novel treatment paradigm for patient suffering from Erectile Dysfunction (ED) and will improve the quality of life for the growing number for patients (and their partners) that do not respond to the current market PDE5i medications. Learn more at initiatorpharma.com.

About erectile dysfunction

Erectile dysfunction is characterized by the inability to develop or maintain an erection of the penis during sexual activity. ED affects more than 150 million men worldwide and that number is expected to increase to more than 320 million by 2025, fuelled by aging demographics and increasing prevalence of life style diseases such as diabetes. The large diabetic ED patient segment is often responding poorly to the current medication and is therefore of particular interest for Initiator Pharma. ED patients have decreased quality of life due to various psychosocial factors such as low self-esteem, depression, sadness, anger, frustration, anxiety, relationship problems etc. (Althof, 2002; Shabsigh et al., 1998, Tsai, 2008; Litwin et al., 1998).
